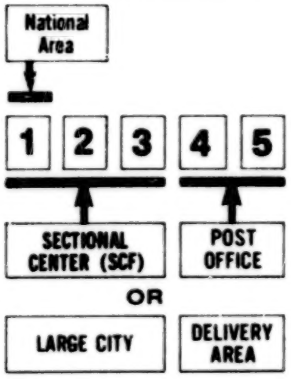
INTRODUCTION

Automation and new technology are increasingly being used by the Postal Service as in many other major businesses and industries. In order to make the best use of new automated equipment for the benefit of all, the Postal Service has introduced the ZIP+4 code. Businesses and post office boxholders were first notified of their ZIP+4 codes in August of 1981. Since then, use of the codes has grown significantly and is now advancing at a more rapid rate.

The ZIP+4 code consists of the present five-digit ZIP Code, a hyphen and four new digits. The five-digit ZIP Code will normally remain the same as it is today. It identifies an area of the country and, additionally, contains enough information for sorting to the delivery post office.

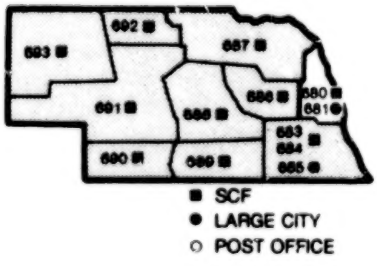
WHAT YOUR ZIP CODE MEANS

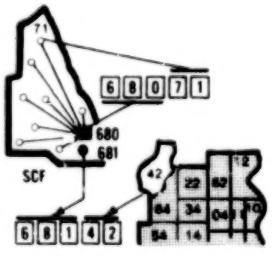


ZIP CODE NATIONAL AREAS

The first digit of a ZIP Code divides the country into national areas, 10 large groups of states numbered from 0 in the Northeast to 9 in the West.

EXAMPLE





Within these large areas, each State is divided into an average of 10 smaller geographic areas which are identified by the 2nd and 3rd digits of the ZIP Code.

The 4th and 5th digits identify a post office or local delivery area.

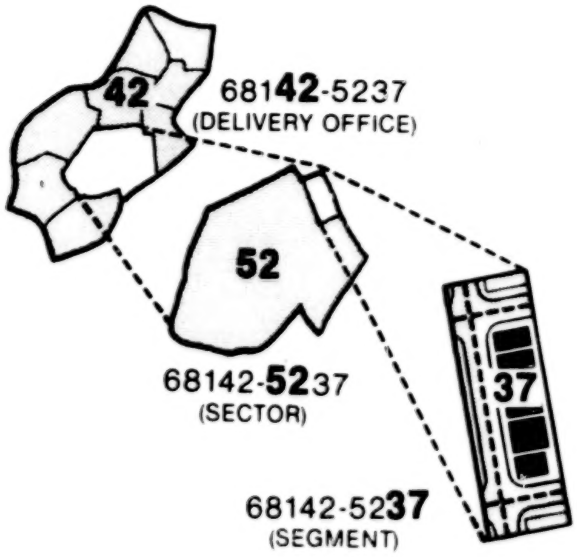
BEST COPY AVAILABLE

WHY THE ADDED FOUR NUMBERS? The four new digits enable automated equipment to sort mail to a specific mail carrier, the person who will make the actual delivery. The first two digits of the "+4" denote a delivery "sector," which may be several blocks, a group of streets, several office buildings or a small geographic area. The last two digits denote a delivery "segment," which might be one floor of an office building, one side of a street, a firm, a suite, a post office box or group of boxes, or other specific geographic location.



THE NEW AUTOMATION. After an optical character reader (OCR) "reads" the ZIP+4 code from a typed or printed address, it prints a bar code on the lower right portion of the envelope. When the letter reaches the post office that serves the addressee, a bar code reader can then decipher the bar code and automatically sort the letter to the right mail carrier.

THE BENEFITS. The ZIP+4 program creates a new opportunity both for mailers and for the Postal Service. The use of ZIP+4 codes on machinable First-Class letters and cards that can be read by an optical character reader will allow us all to realize the maximum benefits from automation. Mailers will receive more reliable, consistent and accurate mail service. Moreover, the ZIP+4 coding discounts to businesses will compensate volume mailers who have made the conversion to ZIP+4 codes. Since use of ZIP+4 codes will enable the Postal Service to improve its productivity while reducing its costs, ZIP+4 coding also offers greater future rate stability for all mailers.

HOW TO FIND A ZIP+4 CODE IN THIS DIRECTORY

The following instructions and sample page layout will help you to find the right ZIP+4 code for mailing addresses.

1. Find the city or post office name in alphabetical order in the ZIP+4 Directory Section.

   If you cannot find it, it may be misspelled. Refer to the Alphabetical List of Post Offices at the end of this section for the correct spelling of all postal unit names.

   If you still cannot find it, it is probably a non-postal name. In that case you must have the correct five-digit ZIP Code to use this directory. If you have the five-digit ZIP Code, look up the name of the parent post office in the Numerical List of Post Offices in the following pages of this section. Then find that post office in the ZIP+4 Directory Section.

2. Find the group of address entries that matches the type of address you are looking up.

   The Postmaster's Code and General Delivery Code are listed first. Then post office boxes are listed, followed by rural routes, named streets and numbered streets.

3. Find the entry that includes in its range of addresses the address you are looking up.

   The first two numbers of an entry tell you its range.

4. Look below the entry to see if the address appears by itself. If it does and there are no further entries for that address, copy the entire ZIP+4 code beside it. It will look like 12345-1234.

   If many entries are shown for the same address, (e.g., firm names, apartment numbers or ranges, or suite numbers or ranges), select the one that matches or includes the address information you have. Copy the entire ZIP+4 code beside it and you have the code. If you cannot find an entry that matches or includes your address information, copy the ZIP+4 code on the line that shows the house or building number.

5. If the address does not appear by itself and it is a *Street, Avenue, Road, Drive, etc.*, look at the house or building number. If it is even, copy the entire ZIP+4 code beside the letter "E" and you have the code. If it is odd, copy the entire ZIP+4 code beside the letter "O." A "B" means the code beside it is for both odd and even house or building numbers.

   If the address does not appear by itself and it is a *Post Office Box* number, look beside the entry, write down the five-digit ZIP Code followed by a "-," and the appropriate four-digit add-on code which can be determined as follows:

   If only one four-digit add-on code appears next to the entry, copy that code.

   If a range of codes appears next to the entry, you will have to calculate the code by subtracting the post office box number from the highest number in the post office box range that includes the box you are looking up. Then subtract that result from the highest four-digit add-on of the ZIP+4 code range. The resulting four-digit number is the add-on code that will complete the ZIP+4 code you desire.

   If the address does not appear by itself and it is a *Rural Route* (or *Highway Contract Route*) box number, look for the range of box numbers in which it is included. Copy the entire ZIP+4 code beside that range of box numbers. If the rural route box number does not appear by itself and is not included in any of the ranges shown, use the alternate code on the last line of the rural route group.

   If the address is a *Rural Route* (or *Highway Contract Route*), but the box number is unknown, use the alternate code on the last line of the rural route group.

6. If the address is an *Army Post Office (APO)* or a *Fleet Post Office (FPO)*, find the five-digit ZIP Code in the Alphabetical List of Post Offices at the end of this section and add "-5000". (Military personnel should use their internally assigned four-digit add-on code.)

ALPHABETICAL LIST OF POST OFFICES

The following columns list in alphabetical order the names and ZIP Codes of Post Offices and related postal units within this State. Related postal units listed here include branches (B,BX), stations (S,SX), community post offices (CPO), educational institutions (E) and place names (P). These postal units are also grouped in alphabetical order beneath the name of their parent Post Office. Addresses in the ZIP+4 Directory List pages (next section) are grouped under their respective Post Office name.
